

March 2024 Release Notes

We've made the following enhancements to ECO[®] dashboards to provide a better user experience when viewing data and to enable you to gain more insights to inform your organizational discussions with Freddie Mac.

Overview of Changes

• Executive Summary

What's new:

Redesigned the Purchase Summary, Affordable Summary and Risk Summary to be more aligned with Freddie Mac's internal Executive Summary.

Benefits:

Now you can view the same metrics and trends that your Freddie Mac representatives are monitoring – giving you a complete view with a much wider summary of the data contained in the subsequent ECO pages. This will help you better focus resources and offers greater transparency to strengthen our working relationship.

Risk Summary

What's new:

Moved the Preliminary QC Performing Loan Not Acceptable Quality (PL NAQ) rate view from the Executive Summary Key Performance Indicator (KPI) to the QC Performing Loan NAQ dashboard. We also modified the QC PL NAQ Loan Level Data Download data frequency from monthly to daily. So, "Data as of" will show the daily date.

Benefits:

With the Preliminary QC PL NAQ rate in the QC PL NAQ reporting KPI view moved to current incomplete quarter, you'll have a better view of the potential floor and ceiling for where the rate will end up in the current quarter. This will allow your organization to be better informed in their discussion with Freddie Mac's quality control (QC) team.

Super Conforming Monitoring Dashboard

What's new:

We've modified the dashboard to display the prior month and changed the default from graph to table view. We also added the Loan Level Data Download report.

Benefits:

The current dashboard resets at the beginning of each month. You told us that having the prior month's results would be helpful and could provide you an on-screen month-over-month comparison to view trends.

Executive Summary Dashboard

Dashboard Access:

Click on the downward arrow icon on the Home page next to *Executive Summary* to view the modified *Purchase Summary*, *Affordable Summary* and *Risk Summary*.
